

BOLT-UP / HYDRO-TEST

- Bolt up & torque services
- Hydrostatic testing & X-Ray services

WE STOCK STEEL

FaberFab has the area's largest inventory of stock steel, pipe and fittings. Here are some of the materials we keep in stock:

- Carbon Steel pipe 1/8" through 20", flanges, fittings, gaskets and bolts
- Carbon steel angle, channel, square tubing, flat bar, H and I beams
- A572 GR50 and A-36 Carbon Steel Plate 14GA through 4".
- 4140 and Carbon steel rounds from 1/2" through 5" O.D.
- Materials for handrails, grating, structural repair

FaberFab has over 45,000 sq. ft under roof, and 13 acres available for material staging, with the ability to grow with the demands of the market. In addition to our pipe fabrication building, Faber has full service machine and electrical shops.

We provide turnkey solutions for every segment of the power and energy industry. We take pride in being a resource for every welding, fabrication or machine shop project, big or small. We understand that this is an industry that never sleeps and we support it with a combination of skilled labor, highly efficient manufacturing techniques and a "Can-Do" attitude. We value our customers and we look forward to doing business with you.

FABRICATION

BOLT UP HYDRO-TEST SERVICES

FABERFAB

ENERGY FIELD AND FABRICATION SERVICES

WELDING

MACHINING DESIGN & BUILD

WELDING

FaberFab offers Certified (ASME Section IX and AWS D1.1) welding services in the shop, or in the field. Services include:

- Aluminum, stainless steel and carbon steel pipe and structural welding.
- Wellhead installation & pressure testing

PIPE FABRICATION

Want to save time & money on your next pipe fabrication job?

Our Robotic Welder and Semi-Automatic Weld Manipulators provide:

- Faster weld cycle times
- No breaks in production
- Better quality weld product
- Consistent welds

SKIDS

FaberFab is more than just a fabrication shop—we have an experienced team of mechanical and electrical engineers to design and build even the most complex units.

**Need 24/7
Emergency
Response?
Call Us At:

FABRICATION

**If you can
imagine it,
we can
build it!**

Most of our custom fabrication projects do not include a print, but we have 2D, 3D and CAD/CAM capabilities to design and build complex designs with the ultimate precision.

MACHINING

When you need a quick turn-around for your next machine shop project, call FaberFab

With our large materials inventory, modern large capacity equipment and our experienced team, many projects can be completed on the same day. We take pride in providing the most prompt and quality service in the area.

REPAIR & REFURBISH

Do you have some equipment that could use a makeover?

No need to spend your budget on brand new stuff, when we can make it look like new at a fraction of the cost. A typical repair job, like the pipe arm in the “Before & After” photos shown above, may require the following services:

- Sandblasting
- Identifying all stress cracks with MPI Testing
- Welding up all stress cracks & check with MPI Testing
- Machining all new pins
- Checking and/or reconditioning all bores
- Priming and Painting
