**STRUCTURAL/PIPE WELDING**

Specializing in 1/8 inch through 1" thick material, we execute aluminum, stainless steel or carbon steel welding projects with state-of-the-art manual, semi-automatic or fully automatic robotic welding equipment.

- AWS D.1.1 (Structural) and ASME Section IV (Pipe) qualified welders.
- Structural projects expedited by in-house stock, saws & fixturing
- Pipe shop is set up to efficiently fabricate carbon steel and stainless steel pipe.
- Semi-automatic weld manipulators and robotic welder produce welds at a rate and quality that is unmatched by any other process.

**STOCK STEEL**

FaberFab has the area's most readily available inventory of stock steel, pipe and fittings, such as:

- Carbon Steel angle, channel, square tubing, flat bar, H and I beams
- Steel pipe 1/8" through 20" cut to length
- A572 GR50 and A-36 Carbon Steel Plate 18GA through 4"
- 4140 and Carbon Steel rounds from 1/2" through 5" O.D.
- Materials for handrails, grating, structural repair.

**REPAIR / REFURBISH**

No need to spend your budget on brand new equipment when we can make your well used items function and look like new at a fraction of the cost.

Repair services:

- Repair & resurface rolls & shafts
- Sandblasting
- Identifying stress cracks with MPI testing
- Welding up stress cracks & inspect with MPI testing
- Machining new parts
- Checking/reconditioning bores
- Priming & Painting

**MACHINING, TOOL & DIE**

We tackle your machine shop projects with a skilled team, large capacity state-of-the-art CNC equipment served by overhead cranes and a large steel materials inventory. We promise high quality and the quickest possible turnaround on your machine shop projects.

- Tool, die and fixture making and repair
- We have the ability to machine parts weighing a few ounces up to 8,800 pounds.
- We stock a large selection of 1018, 304, 316, 4140 and 416 round stock and A-36 and A-572 Grade 50 plate.
- We can procure non-stock materials efficiently through our network of vendors.

**FABRICATION**

At FaberFab, fabrication is the art of combining pipe, plate, structural shapes and vendor supplied components with our capabilities to burn, cut, saw, machine, bend, roll, form, weld and finish to make the things you need in a efficient and timely manner.

- Quick turn around
- High quality
- No job is too small or too large
- Walk in customers welcome.

**SKIDS**

We can provide modular skids for many applications, including:

- Chemical Process
- Natural Gas Metering
- Water Metering, Treatment & Filtration
- Fuel Oil Pumping and Filtration
- Natural Gas, Digester Gas, or Landfill Gas Regulation, Control and Conditioning
